Related titles from Woodhead's food science, technology and nutrition list:

Foodborne pathogens (ISBN: 1 85573 454 0)

A practical guide to identifying, understanding and controlling foodborne pathogens. This book relates current research to practical strategies for risk analysis and control and is designed for both microbiologists and non-specialists, particularly those concerned directly with food processing operations. The first part of the book examines specific microbiological hazards. This is followed by an examination of risk assessment and the concluding section provides a guide to controlling pathogens throughout the supply chain from farmer to consumer.

Food chemical safety: Contaminants Volume 1 (ISBN: 1 85573 462 1)

This volume provides comprehensive information about contaminants in the food industry. The book opens with an explanation of risk analysis and analytical methods used for detecting contaminants. This is followed by full details of EU and USA regulations. The second part of the book provides information about specific contaminants.

Food chemical safety: Additives Volume 2 (ISBN: 1 85573 563 6)

This volume provides comprehensive information about additives in the food industry. The book opens with an explanation of risk analysis and analytical methods in relation to the use of additives in food products. This is followed by full details of relevant EU and USA regulations. The second part of the book provides information about specific subjects including flavourings, sweeteners and colourings.
