Index

abrasion peeling, 96
absolute humidity, 313
absorption, 198
  carbon dioxide – gas packing, 411
  cooking oils, 358, 362
  ethylene – fruit ripening, 415
  latent heat – phase transition, 9
  moisture, 46
  radiant energy, 381
  UV energy, 222
absorptivity, 381
accelerated freeze drying, 370, **447**
acetic acid, 177, 182
acoustic drying., 225
active packaging, 413, 497
additives in foods, 555
adiabatic cooling of air, 313
adsorption
  immobilised enzymes, 187
  ion exchange, 160
aerosol cans, 477, 516
agglomeration – powders, 100, 296, 328, **336**, 456
agitators – mixing, 130
aims of the food industry, 1
air, 26, 115, 234, 313, 407
  as a drying medium, 314
  as a freezing medium, 426
  classifiers, 85
  conveying, 535
  fluidised beds, 327
  knives, 459
air knives, 456, 458
alcoholic and mixed alcohol-acid fermentations, 179
algorithms – computer control, 72
alkaline phosphatase – milk, 242
alkylcyclobutanones – irradiated foods, 207
aluminium cans, 476
aluminium foil, 134, 467, 477, 516, 519
ambient-temperature processing, 81
ammonia – refrigerant, 397, 429
amylase, 182, 188
anchor and gate agitator, 131
annealing, 478
anthocyanins, 273, 337, 434
apparent viscosity – fluids, 14
apples, 95, 104, 239, 274, 389, 406
applications of enzymes in food processing, 187
aromas produced by baking, 349
aseptic processing, 4, **264**, 268, 374, 378
aspiration – sorting, 94
atomisers – spray drying, 330
attrition force – size reduction, 99
automated guided vehicles, 544
automatic control, **64**, 96, 295, 323, 368
automation, 2, **64**, 531

bacon, 357, 372, 410
bag-in-box, 87, 483, 486, 496, 524
baked beans, 92, 252
baking, **341**, 370, 372, 382, 552
ball drier, 334
ball mills, 105
band sealer, 521
bar codes, 499
barrier properties – packaging, 46, 413, 463, 481, 497
basket centrifuges, 146
batch culture – fermentation, 171
battered foods, 355

batters, 118
  cakes, 12, 15, **115**, 342
  coating materials, 456
beer, 73, 141, 157, **181**, 242, 474
Beer–Lambert law, 466
belt conveyors, 535
Bernoulli's equation, 22
BET (Brunauer-Emmett-Teller) monolayer, 46
bin driers, 323
Bingham or Casson plastic fluids, 13
biological oxidation demand (BOD), 85, 505
Biot number, 35
biscuits, 132, 343, 372, 456, 467, 506
blackcurrants, 85
blanchers, 235, 274
blanching, 58, **233**, 252, 317, 337, 370, 372, 378
blast freezers, 426
blending, **73**, 118, 129
blow moulding – packaging, 489
boards – packaging, 493
boiling pans, 244
boiling point, 22, 279, 280
Bond's law size reduction, 101
boundary films, **23**, 245, 261, 280, 283, 313, 342, 356, 398, 423, 426
bowl centrifuge, 144
bowl chopper, 105, 132
bread, 108, 132, **179**, 185, 224, 342, 348, 412, 418, 482, 492
  moulding equipment, 134
breadcrumbs, 456
breaded foods, 355
breading equipment, 459
breakfast cereal, 154, 300, 305, **311**, 351, 352, 372
broken heating curve – canning, 253, 257
bromelain, 191
bucket elevators, 538
bulk density, 11, 335
butter, **114**, 132, 178, 192, 370, 491

cabbage, 178, 407
caesium – irradiation, 199
cake, 16, 110, **115**, 132, 191, 224, 351, 411, 427, 456
calandria, 285
calcium chloride – blanching, 239
can manufacture, 475
canning, 30, 233, **250**, 262, 374, 553
carbon dioxide, 154, 174, 179
  cryogenic grinding, 100
  dry ice, 399
  latent heat – cryogenic chilling, 399
  MAP, 407
  product of fermentation, 174
  refrigerant, 430
  supercritical extraction, 154
  toxicity, 399
carborundum, 96
carotene, 108, 204, 248, 337, 373, 435
cartons, 267, 490, 512, 519
case hardening, 335, 371
casein micelles, 178
cassava, 178
catalase, 234
caustic peeling, 96
cavitation, 112, 113, 224, 330
cellulase, 191
cellulose, 183, 470, 482, 484, 490, 519
centralised control systems, 74
centrifugal
  atomiser – spray drying, 330
  clarification, 142
  clarifiers, 145
  filtration, 149
  fluidised bed drier, 328
  force, 91, 103, 128, **141**, 290, 329
  pumps, 538
centrifugation, **141**, 450, 542
centrifuges, 142, 145
cereals, 92, 178, 295, 332, 486, 493
CFCs, 397
chain conveyor, 347
changes during frozen storage of foods, 434
checkweighers, 527
cheese, 14, 140, **179**, 415, 484, 489, 553
chemical oxidation demand (COD), 85, 541
chest freezers, 425
chill storage, temperature monitoring, 388, 398
chilled foods, 387, 402, 493
chilling, 387, 406
chilling injury – fruits, 387
chlorophyll, 239, 273, 337, 434, 552
chocolate, 13, 38, 123, 132, 182, 307, 370, 455, 460, 489, 519
chopping, 98
cider, 149
citrus fruits, 96, 154, 191
classifiers, 85
cleaning
  equipment, 15, 71, 210, 396, 533
  foods, **83**, 233, 540
  in-place (CIP), 64, 165, 269, 538
climacteric ripening – fruits, 389
climbing film evaporator, 288
Clostridium botulinum, 201, 251, 411, 433
closures – packaging, 477, 513
coated films – packaging, 484
coating
  foods, 128, 328, 432, 455
  membranes, 164
  polymer films, 483, 484, 492
  tinplate, 475

cobalt – irradiation source, 199
cocoa, 182, 185, 382
cocoa butter, 456
coextruded films – packaging, 413, 485
coffee, 86, 141, 157, **182**, 311, 411, 441, 470, 535
cold extrusion, 295, 305
cold shortening – meats, 389
cold stores, 399, 408, 425, 436
collapse temperature – freeze drying, 444
collation sorting, 94
colloid mills, 106, 112
colloidal food systems, 16
colour, 50
  changes in foods due to
    baking, 349
    blanching, 239
    canning, 273
    dehydration, 337
    evaporation, 291
    extrusion, 296
    fermentation, 185
    freezing, 436
    frying, 359, 361, 362
    homogenisation, 115
    pasteurisation, 248
  printing, 498
  sensors, 69
  sorting, 86, 92
colourants used in glass, 479
coloured indicators – frozen foods, 437
combi-bins, 463, 506
combined packaging systems, 496
commercial sterility, 42, 251
compound coatings, 455
compression force – size reduction, 99
computer control, 64, **72**, 103, 179, 264, 276, 286, 323, 359, 544
concentration, **157**, 172, 278, 397, 418, 441, 449
concentric tube heat exchangers, 248, 269
condensers
  freeze drying, 444, 446
  mechanical refrigerators, 396
  supercritical extraction, 155
conduction – heat transfer, **27**, 233, 252, 331, 342, 357, 366, 446
confectionery, 70, 103, 118, 132, 154, 188, 295, 304, 415, 455, 482, 493, 512, 519, 541
confectionery moulders, 138
constant rate period – dehydration, 317
contact driers, 333
containers
  aerosol, 477
  aluminium foil, 478
  bag-in-box, 496
  bar codes, 499

    of gases, 408
    of water and ice, **370**, 438
  death time (TDT) – micro-organisms, 42, 254
  diffusivity, 29, 423, 438
  efficiency
    baking, 344
    evaporators, 331
    frying, 360
  expansion – coefficient, 31
  history of cooking oil, 362
  lag factor – canning, 255
  shock to containers, **243**, 262, 480
  shock to foods, 432
  wheel, 39, 323
thermoluminescence – irradiated foods, 206
thermophilic bacteria, 263, 392
thixotropic fluid, 13
throttling factor – extruders, 298
tinplate, 477, 504
tomato ketchup, 13, 248, 490
tomato puree, 264, 289, 478
tomatoes, 13, 92, 103, 159, 203, 274, 463
torbed drier, 328, 459
total quality management (TQM), **53**, 392
transitional flow – fluid flow, 25
tray drier, 323
trough drier, 327
tubular heat exchangers, **268**, 272, 379
tubular membranes, 165
tumbling mixers, 128
tunnel
  annealing – glass manufacture, 479
  blancher, 235, 243
  cooker-cooler – heat sterilisation, 263
  cooling, 138, 459
  drier, 325
  freezers, 426, 431
  microwave drier, 372
  microwave heater, 369
  oven, 347, 372
  pasteuriser, 243
  radiant heater, 382
  shrink-wrapping, 525
turbulent flow, **24**, 30, 129, 166, 267
Twintherm – UHT heat exchanger, 271

UHT processing, **265**, 375, 494
ultrafiltration, 157, **159**
ultrasonic
  cleaning, 85
  cutter, 102
  drying, 330
  energy, 113
  heat sealer – packaging, 521
  homogenisers, 112
  nozzle atomiser – spray drying, 330
  processing (Ultrasonication), 224
ultrasound, 69, 224
ultraviolet light, 86, 267
unfrozen water, 418, 422, 443
unit loads – materials handling, 505, 531
unmixing, 119
unsteady-state heat transfer, **27**, 35, 233, 389, 423
usage value – materials handling, 543

vacuum
band and shelf driers, 332, 382
chamber – deaeration of juices, 244
cooler, 398
drying, 323
evaporation, 282, 287
fillers, 512
filtration, 149, 450
flash coolers, 269, 291
freeze drying, 441, 446
gauge, 12
headspace, 234, 261, 337, 471, 513, 526
packing, 198, 395, 406
pervaporation, 161
puff freeze drying, 443
pumps, 12, 150, 261, 285, 442, 538
seals – packaging, 515
skin packaging, 406, 409
thawing, 439
thermoforming – packaging, 489
vaned disc impeller, 129
vapour pressure, 16, **44**, 278, 313, 342, 356, 432
vapour recompression, 39, **284**, 431
variable-aperture screens, 91
vegetables
blanching, 233
chilling, 400
effect of
canning, 273
drying, 337
freezing, 432
fermentation, 177
modified atmosphere storage, 413
peeling, 95
size reduction, 102
sorting, 92
storage temperatures and humidities, 389
vibratory conveyors, 535
video cameras – sorting, 92
vinegar, 182, 441, 489
viscoelastic foods, 14, 123
viscosity, **13**, 24, 111, 119, 359
vision system – sorting, 77
vitamin C, 108, 204, 248, 291, 338, 351, 402, 434,
vitamins – effect of processing, 43, 50, 115, 185, 204, 238, 274, 308, 338, 350, 362, 434, 448
vitamins in foods, 549
voidage – fluidised beds, 26
volatile decomposition products – frying, 361
vortex – formation in fluids, 122, 124, 129

warmed-over flavour – chilled foods, 402
wash column – freeze concentration, 450
washing equipment, 540
wastes and liquid effluents, 540
water absorption index (WAI) – extrusion, 297
water activity, 10, **44**, 177, 278, 295, 311, 418, 434, 441, 467, 470
water solubility characteristic – extrusion, 297
water vapour
movement in
baking, 342
chilling, 467
cold stores, 426
dehydration, 313
diffusion, 18, 46
evaporation, 278
freeze drying, 442
freezing, 432
frying, 356
permeability of packaging materials, 411, 467, 483
water-holding capacity
meat proteins, 114
wax coating – packaging, 492
weighing, 532
weight sorting, 93
wet bulb temperature, 318
wettability – powders, 336
wheat, 95, 100, 108, 552
wine, 141, 150, 181, 244, 441, 474, 553
wooden containers, 474

X-rays
irradiation, 196
sorting, 86

yeasts, 43, 47, 145, 179, 181, 182, 202, 217, 241, 433
yield stress, 16
yoghurt, 13, 170, **178**, 217, 270, 387, 489
Young's modulus, 472

Z blade mixer, 131
z values
enzymes, 234
micro-organisms, **42**, 251, 273
