ISA–The Instrumentation, Systems, and Automation Society

Advances in Water Treatment Analyzer Technology

By: Rodney LeBlanc, HACH Company

Thursday, January 20th, 2005
11:30 - 12:30 pm
Holiday Inn, Gonzales <<< Location Change!

Cost: $12 if you RSVP by Noon Monday Jan 17th or $15 at the door

RSVP To: isareservations@hotmail.com or (225) 201-6480

READ-OUT
January, 2005
VOLUME 19
NUMBER 5

IN THIS ISSUE…
Society & Section Information, Board listing, Announcements, Calendar of Events

President's Corner

I would like to wish you all a Happy New Year! I hope that you had a very relaxing and fun-filled holiday. As we start this new year and reflect on new resolutions, I would like to encourage us all to re-commit and focus on safety. Safety is something that we can all impact. The choices we make at work effect our industry and loved ones. We can each make a difference by taking accountability for safety in our work areas. We can all work towards NO HARM TO PEOPLE at work and at home.

Our first meeting will be held on Thursday, January 20 at the Holiday Inn in Gonzales. Note the change in location. Our speaker will be Rodney Leblanc with the Hach Company. The topic will be "*Advances in Water Treatment Analyzer Technology.*" Rodney will focus on some of the new technologies and will introduce digital communications platforms in water treatment analyzers. We look forward to seeing you there! Also, note the first Certified Automation Professionals (CAPs) and Certified Industrial Maintenance Mechanics (CIMMs). Several of the newly certified CIMMs are from Louisiana. Also, note the announcement of $25,000 to be given away as scholarships. Info on how undergraduate and graduate students can apply is listed. The deadline for application is February 15.

We would like to hold a Golf Tournament later this year. If you are interested in this event or would like to help coordinate, please contact me at Melissa.Dotson@shell.com. We use the proceeds from events like this to sponsor the 4 scholarships that we award annually.

In closing, I hope this year is off to a great start. Let's remember those that are devastated by the recent tsunamis in our thoughts and prayers.

Sincerely,
Melissa Dotson

Announcements:

I would encourage all our members to check their information at ISA. This information is critical to the Baton Rouge section as the mailing address and e-mail address listed with ISA national is our only means to contact you. If/when last minute changes occur, our only real means to contact everyone is via e-mail and over 25% of our members either don't have an e-mail listed or the address is invalid. The information you list is only used by ISA National and your local section for ISA business. We do not sell or share this information with anyone.

To check and update your information, goto www.isa.org and click on the My ISA tab at the top, select My Membership then select Update My Record on the left hand side menu.

Updating your record will ensure you get the latest information from the Baton Rouge section. Only you can make changes so please take a few minutes to check everything.

Professional Development Hours:

Continuing Education Requirements for Registered Professional Engineers

As of January 1, 1999, the State of Louisiana began requiring Licensed Professional Engineers to participate in a continuing education process as a condition for registration renewal. During each biennial registration renewal period, every engineer registrant, including those registered in two or more disciplines, is required to obtain 30 Professional Development Hours (PDH's) in engineering related activities. The local section can help. Many of our section meetings qualify toward this requirement.

Sample Certification Questions

Certified Automation Professional (CAP Domain I -– Feasibility Study)
MOST initial project budgetary cost estimates have an acceptable margin of error of plus or minus:

A. 10%
B. 30%
C. 50%
D. 70%

Answer: **B.** 30%
It's commonly accepted to have a preliminary estimate with a margin of error of plus or minus 30%. A more detailed estimate is done before the bid is presented to reduce the margin of error to 10%.
Reference: Whitt. *Successful Instrument and Control System Design*. ISA, 2004.

Certified Control Systems Technician (Level I, Domain I -– Calibration)
The difference between the indication of the instrument and the actual value of the measured variable is:

A. the controlled variable
B. called set point
C. an error in the measuring instrument
D. discarded

Answer: **C.** An error in the measuring instrument
The prompt is very nearly the definition of an error signal-—the difference between the indication and the ideal value of the measured signal (set point)-—and thus seems familiar. Actually we have a bad meter here.

Certified Industrial Maintenance Mechanic (Domain II -– Preventive and Predictive maintenance)
Which of the following is an example of a predictive maintenance task?

A. Changing oil on an hour meter set point
B. Changing v-belts once a year on a fan drive
C. Lubricating equipment on a set schedule
D. Monitoring with vibration equipment

Answer: **D.** Monitoring with vibration equipment
Vibration analysis is a form of predictive maintenance. The output curves of analysis assist in determining the condition of loose band wear on the equipment. Changing oil and v-belts and performing lubrication on equipment are preventive maintenance efforts.
Reference: Mobley. *An Introduction to Predictive Maintenance*. Woburn, MA., Butterworth-Heinmann, 2002.

APPLICATION DEADLINE APPROACHING FOR ISA CERTIFICATION EXAMS OFFERED IN MARCH

4 February 2005 is the application deadline for the 19 March public test offering of the Certified Automation Professional (CAP), Certified Control Systems Technician (CCST), and Certified Industrial Maintenance Mechanic (CIMM). For a complete listing of exam dates and locations, visit http://www.isa.org/Template.cfm?Section=Certification&Template=/Content/ContentGroups/MultiUse/exam_schedule.htm

ISA EDUCATIONAL FOUNDATION SCHOLARSHIPS FOR 2005

ISA will award more than $25,000 in educational scholarships next year to graduate and undergraduate college students studying instrumentation, systems, or automation. The ISA Educational Foundation awards scholarships annually to outstanding students in our field who have a 3.0 GPA or higher (on a 4 point scale). If you know of students who qualify, have them download the application through http://www.isa.org/Content/NavigationMenu/Educators_and_Students/Scholarships/Scholarships.htm, or contact Michaela Johnson-Tena, Member Services Section Division Coordinator at (919) 990-9400 or mtena@isa.org.
But, do it soon - applications are due by 15 February 2005!

ANNOUNCING THE FIRST CAPs AND CIMMs

Congratulations to ISA's newly certified CAPs and CIMMs. These two certification programs, developed in 2004 with the first exams offered last October, now have an inaugural group of certified professionals.

To search for CAPs in your Section visit http://www.isa.org/Content/NavigationMenu/Professionals_and_Practitioners/Certification/Certified_Automation_Professional/CAP_Search.htm

To search for CIMMs in your Section visit http://www.isa.org/Content/NavigationMenu/Professionals_and_Practitioners/Certification/Certified_Industrial_Maintenance_Mechanic/CIMM_Search.htm

If you would like more information on becoming certified please contact Kristy Becker, CMP, Certification Administrator at kbecker@isa.org or (919) 990-9219.

READ-OUT is the newsletter of ISA Baton Rouge Section and is published 9 times a year. Business card ads by sponsors are $150 per year, double ads are $275. If you are interested in an ad, have an announcement, comment, question or suggestion; please contact us. **Deadline for ads, articles, etc. is noon on the last Friday of the month! Please provide the information to the editor by email to william.christopher@shell.com**

NATIONAL ENGINEERS WEEK

National Engineers Week (NEW), a formal coalition of more than 70 engineering, education, and cultural societies, and more than 50 corporations and government agencies, was founded in 1951 by the National Society of Professional Engineers. This group is dedicated to raising public awareness of engineers' contributions to society and increasing understanding and interest among students in engineering and technology careers. Each year NEW reaches thousands of schools, businesses, and community groups across the United States. ISA supports NEW as a Contributing Society. Sections are encouraged to get involved locally, as some have been doing for years, and make a difference in your community. Information about the varied programs, and materials to support them, are available at www.eweek.org or by calling (703) 684-2852.

THE NOMINATING CHAIR IS SOLICITING OFFICER NOMINATIONS

The ISA Nominating Committee is seeking candidates for open Society leadership positions. I urge you to submit the names of capable and qualified individuals for the following positions:

- President-elect Secretary
- Vice President-elect, Image & Membership Department
- Vice President-elect, Industries & Sciences Department
- Vice President-elect, Professional Development Department
- Vice President-elect, Strategic Planning Department

The nomination process is very simple - just submit a candidate qualification form. Nominations must be submitted no later than 31 January 2005.

The Society Nominating Committee appreciates your support of this very important activity and we look forward to receiving your recommendations.
Go to http://www.isa.org/officernominations, to view the form and descriptions of the positions.

ISA SENIOR MEMBERSHIP

The Senior Member Grade is ISA's way of recognizing your advanced educational preparation and professional work experience. It is the prerequisite member grade for nomination to "ISA Fellow," one of ISA's highest honors, and for holding elective office at the Society level.

Who qualifies for ISA Senior Grade? If you have 10 years of active work experience in the instrumentation, systems, and automation field (two of which have been in a position of responsible charge), then you may apply for Senior Grade. You can qualify based on a combination of education and experience, also. An undergraduate degree counts as four years toward the ten required. A Masters degree counts as one year, and a Doctorate as two years. The requirement of two years in a position of responsible charge remains. Responsible charge includes directing others in Instrumentation, Systems, and Automation work, and/or individual responsibility for Instrumentation, Systems, and Automation development, application or operation at a professional level, and/or teaching Instrumentation, Systems, and Automation or associated engineering and sciences at a professional level.

If you think you are eligible for consideration and want to apply for Senior Membership, visit us online at :
http://www.isa.org/template.cfm?Section=About_ISA&template=/CustomSource/ISA/seniorfm.cfm

Upcoming Calendar of Events…

January 20th 11:30am - 12:30pm	**Topic: Advances in Water Treatment Analyzer Technology Location: Holiday Inn, Gonzales**
January 25-27th, 2005	**60th Annual Instrumentation Symposium for the Process Industry See Page 8 for full details….**
February 17th 11:30am - 12:30pm	**Topic: Methods and Instruments for Detecting Oil in Water Location: Holiday Inn, Gonzales**
March 17th 11:30am - 12:30pm	**Topic: Simple ESD Valves for SIL 2 and SIL 3 Location: Holiday Inn, Gonzales**

60th Annual Instrumentation Symposium for the Process Industries

January 25-27, 2005
Texas A&M University
College Station, Texas USA

The Texas A&M University Department of Chemical Engineering is pleased to announce the 60th Annual Instrumentation Symposium for the Process Industries. This three day educational event focuses on new technologies and trends in instrumentation and process control that can improve facility performance in areas such as safety, reliability, maintainability and cost performance. The format includes presentations, workshops, roundtable discussions and exhibits hosted and presented by end user, contractor and supplier leaders in the process industries.

The symposium includes:

- Welcome Session and Keynote Speaker
- Presentations (paper and panel) on topics related to upstream and downstream emerging technologies
- Workshops on Safety Instrumented Systems, Foundation Fieldbus, Best Practices, and more
- Engineering Ethics Roundtable - fulfill PE ethics requirement
- Exhibits
- Social event

Who Should Attend:

- Project Engineers and Managers
- Control System Engineers
- Instrument Engineers and Designers
- Safety Engineers
- Inspectors
- Maintenance & Reliability Technicians and Supervisors

Registration Fees:

	Before Dec. 3	After Dec. 3
Full Registration:	$90.00	$100.00
One Day Registration:	$65.00	

For Further Information:

For information on registration, exhibits, housing, or symposium program, visit: http://instrumentation-symposium.tamu.edu or contact the Symposium Coordinator, Mary Cass at: mary-cass@tamu.edu, 979-458-1863, Fax 979-458-0422.
